

ANDY APAEZ

Brooklyn, NY | (929) 508-6968 | andy.apaez16@gmail.com | linkedin.com/in/andy-apaez | github.com/andy-apaez

EDUCATION

College of Staten Island (CUNY)

A.A.S. in Computer Technology

- Relevant Coursework: Introduction to Computer Science (C++)

Staten Island, NY

Expected May 2028

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)

2026

Google Foundations of Cybersecurity (Coursera)

2025

CompTIA Security+

In Progress

PROJECTS

QR Code Online Menu — Mezquilla

2025 – Present

Full-Stack Web Application | HTML, CSS, JavaScript, Node.js, MySQL, Vercel

- Built and deployed a full-stack web menu for a real restaurant, in daily use on Vercel since 2025
- Designed a MySQL database for menu items, categories, and pricing, served to the frontend through a Node.js backend
- Enabled mobile menu access through table QR codes, giving diners a faster way to browse and freeing waiters to focus on service

SIEM Console Prototype

2025

Frontend Application | React, TypeScript, Vite, Recharts

- Built a single-page SIEM console simulating SOC workflows, including alert management, live event monitoring, telemetry health, and threat intelligence watchlists
- Implemented alert filtering by time range, severity, and keyword search using TypeScript data models
- Visualized alert and telemetry volume with Recharts and designed a modular mock-data layer that can be swapped for live APIs

Threat Intelligence Data Pipeline

In Progress

Python, Redpanda, Vector, OpenSearch, Grafana, Docker | github.com/andy-apaez/threat-intelligence-data-pipeline

- Develop a containerized, real-time pipeline that streams simulated threat telemetry — including credential stuffing, supply-chain tampering, and leaked secrets — from a Python generator through Redpanda and Vector into OpenSearch
- Write VRL transforms in Vector to parse raw JSON, normalize event schemas, and enrich events with metadata
- Build Grafana SOC dashboards to visualize attack vectors, geolocation anomalies, and critical IoCs; containerize the full stack for one-command deployment with Docker Compose

EXPERIENCE

Los Tacos (now Mezquilla)

Sept 2024 – May 2025

Server

Brooklyn, NY

- Configured the restaurant's Uber Eats storefront and helped manage online orders alongside in-person service
- Operated and troubleshooted the restaurant's Square POS system for in-person and online orders and payments
- Served customers in a fast-paced restaurant while covering cashier, food prep, and stocking duties

TECHNICAL SKILLS

Languages & Frameworks: Python, C++, JavaScript, TypeScript, SQL (MySQL), HTML/CSS, React, Node.js

Security & Data: OpenSearch, Grafana, Redpanda (Kafka API), Vector (VRL), TCP/IP, port scanning

Cloud & DevOps: AWS (IAM, EC2), Vercel, Docker, Docker Compose, Linux, Git/GitHub

Hands-On Labs: TryHackMe (20 rooms); OverTheWire Bandit (through Level 23): Linux CLI, SSH, file permissions, encoding and compression, cron jobs
